

# MeshGuard

Governance Control Plane for the Agent Mesh

---

David Hurley, Founder  
[meshguard.app](http://meshguard.app)

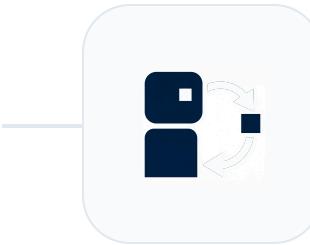

# The AI landscape is evolving from assistants to autonomous agent ecosystems

2022-2023

## Copilots

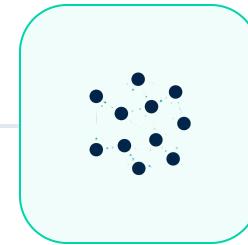

Human-in-the-loop AI assistance.  
Augmenting workflows with  
suggestions and completions.

2024-2025

## Agents

Autonomous task execution. Systems  
capable of executing multi-step tasks  
independently.

2026+

## Agent Mesh

Networked agent-to-agent  
delegation. Complex execution  
chains without human oversight.

**The Shift:** When a sales agent delegates to a data agent, traditional identity controls break down. Each delegation is a potential security gap.

# Agent-to-agent delegation creates ungoverned execution chains with zero visibility

When Agent A delegates to Agent B, traditional identity controls break down. Organizations are operating blind—unable to verify identity, enforce policies, or maintain audit trails across the mesh.

- ✗ No identity verification for agent-to-agent calls
- ✗ Zero policy enforcement at delegation boundaries
- ✗ Incomplete audit trails across agent chains
- ✗ Compliance risk exposure for regulated industries
- ✗ Security vulnerabilities in multi-agent workflows

## The Governance Gap

Regulatory frameworks like GDPR and SOC 2 require audit trails that current agent architectures cannot provide.

# Gartner predicts 40% of enterprises will deploy agent mesh architectures by 2026

# 40%

Enterprises deploying autonomous agent networks within 12 months.

TOTAL ADDRESSABLE MARKET

# \$8 Billion

by 2026

Enterprise AI Adopters

\$4.1B

AI-Native Products

\$2.8B

Regulated Industries

\$1.1B

# 73%

CIOs cite governance as their top AI concern

# \$180K

Average annual enterprise spend on AI security

# 2.3x

Faster adoption rate in regulated sectors

# MeshGuard provides the missing governance layer for agent-to-agent interactions

Sitting between agents as a governance control plane, MeshGuard intercepts every delegation request to enforce identity, policy, and audit requirements in real-time.

## Identity Management

Issues verifiable credentials to agents and ensures authorized identities before delegation.

## Policy Enforcement

Evaluates requests against rules for data access, rate limits, and compliance in real-time.

## Audit Infrastructure

Captures execution traces with context propagation for forensic analysis and compliance.

Integrates seamlessly with your existing agent stack

Custom Agents

**MeshGuard's architecture provides comprehensive governance without performance overhead**

# Existing solutions weren't designed for autonomous agent delegation patterns

**Traditional IAM**  
Okta, Auth0, Ping

---

BUILT FOR  
**Human Users**

MODEL  
**Session-based**

---

✖️ Cannot handle agent delegation chains

**API Gateways**  
Kong, Apigee

---

BUILT FOR  
**Sync Requests**

MODEL  
**Request/Response**

---

✖️ No context propagation across hops

**AI Governance**  
Arthur, Fiddler

---

BUILT FOR  
**Model Bias**

MODEL  
**Monitoring**

---

✖️ No identity or policy enforcement

**MeshGuard**  
**The Agent Standard**

---

BUILT FOR  
**Autonomous Agents**

MODEL  
**Delegation Chains**

✓ Native identity, policy & audit for mesh

# Predictable pricing aligned with agent deployment scale and governance requirements

## Starter

**\$2,000**/mo

For teams building initial agent prototypes and MVPs.

- ✓ Up to 100,000 delegations/mo
- ✓ Basic policy templates
- ✓ 30-day audit retention

## Professional

**\$10,000**/mo

For production agent deployments requiring security.

- ✓ Up to 1M delegations/mo
- ✓ Custom policy engine
- ✓ 1-year audit retention
- ✓ SSO Integration

## Enterprise

**Custom**

For large-scale, regulated deployments.

- ✓ Unlimited delegations
- ✓ On-premise deployment
- ✓ Custom compliance reporting
- ✓ SLA guarantees

**Value Alignment:** Our usage-based model scales with the complexity of your agent mesh, ensuring governance costs match value delivered.

# Four-quarter roadmap focused on product-market fit and enterprise readiness

**Strategic Focus:** Balancing rapid feature iteration with the rigorous security certifications required by enterprise buyers.

# Raising seed round to build the governance standard for agent mesh architectures

# \$3M

Establish MeshGuard as the category leader. Reach 25 paying customers and \$1.2M ARR by Q4 2026.
